

TESTIMONIAL
AMPRO™ CLR

AMPRO™ IS IDEAL FOR CLEAR COATING APPLICATIONS: YOU GET A PERFECT SURFACE BEFORE PAINTING THE BOAT AND IT CURES AT LOW TEMPERATURES. I HEARTILY RECOMMEND THIS PRODUCT.

Restoration of a 50-year-old wooden boat with Gurit AMPRO™ CLR

THE OPTIMIST WORKSHOP: A UNIQUE BUSINESS, BENEFITTING FROM THE UNIQUE PROPERTIES OF AMPRO™ CLR

The Optimist Workshop is a rare find: a business where you can either commission a new-build wooden boat or boat restoration project and even work alongside the owner, Basil Kronenberg, to create your own bespoke vessel. They are a long-time user of the AMPRO™ multi-purpose system. AMPRO™ CLR was used on this project pictured of a kirsch boat, restoring the vessel to its former glory. Basil Kronenberg commented: "In this renovation of a 50-year-old wooden sailboat, I used Gurit AMPRO™ CLR. It is ideal for clear coating applications, and I use it also for filling and bonding. In this example, I applied 6 to 9 layers of AMPRO™, sanding every 2-3 layers, then painting the boat with clear varnish. AMPRO™ is ideal for clear coating applications, you get a perfect surface before painting the boat and it cures even at low temperatures."
